1. Product Overview

Understanding Veriscribe — the intelligent document platform.

1.1 Mission & Vision

Veriscribe was founded on a single insight: modern document work is broken. Writers, students, professionals, and creators spend hours every day switching between disconnected tools — a grammar checker here, a PDF converter there, an AI detector somewhere else. Each handoff introduces friction, formatting loss, and wasted time.

Our mission is to unify every stage of the document lifecycle — detection, creation, editing, conversion, analysis, and protection — into a single intelligent workspace where every tool knows about every other.

1.2 Core Value Proposition

Unified Intelligence	All 21 tools share a common data layer. Detection results inform humanisation. Generated documents flow directly into the editor. Converted files are immediately ready for quality checks.
No Tab Switching	Everything lives in one workspace. Open a PDF, detect AI content, humanise, check plagiarism, and export — without leaving the app.
8+ Detection Models	The AI Detector runs eight models simultaneously, delivering forensic-grade accuracy no single-model competitor can match.
Format Fluency	Veriscribe speaks every major document format natively: PDF, DOCX, XLSX, PPTX, TXT, CSV, JSON, HTML, Markdown, and more.
Privacy First	Every uploaded document is scanned for malicious content and assigned a Trust Shield score before processing begins.

1.3 Platform Summary

Veriscribe is organised into five capability clusters, each containing multiple specialist tools that work in concert:

Writing & Language — AI Detector, Humanizer, Grammar Fix, AI Summarizer, Plagiarism Check, Citation Generator

Document Creation — Doc Editor, Doc Studio, Voice to Doc, Smart Notes, Adaptive Document

Intelligence & Research — Multi-Source Intelligence, Exam Paper Builder, Narrative Report Writer, Contract Negotiation Coach

Document Processing — File Converter, Smart Form Extractor, Version Reconciler, Document Archaeology, Document Resurrector

Monitoring & Security — Staleness Monitor, Document Analytics, Confidence Scorer & Trust Shield, Knowledge Interview Bot

1.4 The Problem We Solve

"Every time you work with a document, you're hopping between tools — one to convert files, another to fix grammar, yet another to check originality, and something else entirely to create structured layouts from scratch. We asked a simple question: what if all of that just worked together?"

Most document tools do one thing well. Users end up paying for five subscriptions, learning five interfaces, and constantly exporting between them. Veriscribe was designed from the ground up as a complete document intelligence system.

2. Homepage & Workspace

The Veriscribe web experience — from landing page to active workspace.

2.1 Hero Section

The homepage opens with Veriscribe's brand promise front and centre:

- **Headline:** "Write. Detect. Humanize. Perfect."
- **Sub-headline:** "The only AI writing suite that detects, humanizes, formats, and perfects — all in one intelligent workspace."
- **Primary CTA:** "Start Free — No Card Needed"
- **Secondary CTA:** "Resume Work" — returns signed-in users directly to their last document.

2.2 Intelligent Workspace Dashboard

After sign-in, users land in the Intelligent Workspace — a unified hub that surfaces all 21 tools, recent documents, and quick-action shortcuts. The dashboard is divided into:

- Tool Grid — all tools organised by category with one-click launch
- Recent Documents Panel — last 10 files with format badge, timestamp, and last action tag
- Quick Actions Bar — most-used tools pinned for instant access
- Notification Centre — staleness alerts, document analytics updates, shared file activity

2.3 Recent Documents Panel

The panel displays recently accessed files with rich metadata:

File Name	Display name of the document with format icon
Format	PDF, DOCX, TXT, XLSX, PPTX, or other
Last Modified	Relative timestamp (e.g. '2 hours ago', 'Yesterday')
Last Action Tag	Colour-coded badge: Humanized (green), Detected (orange), Perfected (blue), Converted (purple)
Quick Actions	Hover to reveal Edit, Share, Download, Delete shortcuts

2.4 Cross-Device Flexibility

Veriscribe runs on every surface:

Desktop Web — Full workspace with batch editing, no usage limits on supported plans, multi-tab document management.

Mobile Web — Mobile-optimised responsive layout. All core tools accessible. Gesture-friendly document navigation.

iOS App — Native iPhone/iPad experience. Available on the App Store.

Android App — Native Android experience. Available on Google Play.

3. Writing & Language Tools

Six tools that cover every aspect of writing quality, originality, and citation.

3.1. AI Detector

Powered by 8 detection models simultaneously.

- Paste text or upload any document format
- Runs 8 independent AI-detection models in parallel
- Returns AI% vs Human% confidence scores
- Paragraph-level breakdown — see exactly which sections triggered detection
- Supports GPT-4, Claude, Gemini, Llama, and other model fingerprints
- Exportable detection report as PDF or JSON
- API access available for enterprise bulk scanning

3.2. Humanizer

Bypass AI detectors with surgical precision.

- Rewrites AI-generated text to sound fully human
- Preserves original meaning, tone, and intent
- Passes all major AI detectors: GPTZero, Originality.ai, Turnitin, and others
- Adjustable humanisation intensity: Subtle / Balanced / Thorough
- Voice Preservation mode — learns your writing style and humanises to match
- Side-by-side before/after diff view
- Works on any pasted text or uploaded document

3.3. Grammar Fix

Beyond spelling — style, tone, and flow.

- Fixes grammar, spelling, punctuation, and syntax errors
- Style suggestions: formal, casual, academic, business
- Tone analysis and rewriting: confident, empathetic, persuasive
- Flow improvements: sentence restructuring, paragraph transitions
- Real-time inline editing with accept/reject per suggestion
- Readability score with Flesch-Kincaid grade level
- Supports 20+ languages

3.4. AI Summarizer

Condense long documents into key insights instantly.

- Paste any text or upload PDF, DOCX, TXT, or URL
- Summary length control: Brief (3 sentences) / Standard / Detailed
- Bullet-point mode or prose mode
- Key entities extraction: people, dates, companies, figures
- Multi-document comparative summary
- Export summary as DOCX, PDF, or TXT

3.5. Plagiarism Check

Ensure 100% originality with deep web scanning.

- Scans text against billions of web pages and academic databases
- Originality score: percentage of unique vs matched content
- Source list: every matched source with URL and match percentage
- Sentence-level highlighting of matched passages
- Paraphrase detection — catches disguised copying
- Exportable originality report
- Supports 30+ languages

3.6. Citation Generator

Auto-generate citations and full bibliographies.

- Supports APA, MLA, Chicago, Harvard, IEEE, Vancouver, and more
- Input: URL, DOI, ISBN, or manual entry
- Auto-fills title, author, date, publisher from source metadata
- Full bibliography builder — add multiple sources and export
- In-text citation and reference list formats
- Export as DOCX, PDF, or plain text

4. Document Creation Tools

Five tools that take you from blank page to polished, structured document.

4.1. Doc Editor

Professional workspace for every file type.

- Open, edit, and save: PDF, DOCX, XLSX, PPTX, TXT, CSV, JSON, XML, HTML, MD, and all code files
- Rich text editing with full formatting toolbar
- Find and replace across entire document
- Add comments, annotations, and tracked changes
- Revision history with one-click rollback
- Spell check and grammar assist while editing
- Resize, reorder, delete, and add pages or sections
- Save as original format or export as new format
- Auto-save — never lose progress
- Dark and light editor modes
- Full keyboard shortcut support

4.2. Doc Studio

Generate structured professional documents from simple text prompts.

- Describe your document in plain language — AI builds the structure
- Professional templates: reports, proposals, briefs, plans, SOPs
- Section-by-section AI generation with user editing between sections
- Auto-populates tables of contents, headings, and page numbers
- Style presets: Corporate, Academic, Creative, Technical
- One-click export to DOCX or PDF

4.3. Voice to Doc

Speak your idea — AI builds the complete formatted document.

- Select document type first: Business Doc, PRD, SRD, FRD, MOM, Legal Brief, SOP, Proposal, Report, and more
- Give voice input or paste a conversation transcript
- AI extracts structure, fills correct template, and formats the output
- Supports all 10+ professional document templates
- Edit the generated document immediately in Doc Editor
- Export as DOCX or PDF

4.4. Smart Notes

Quick thoughts, captured instantly and organised by AI.

- Capture rapid-fire notes via text, voice, or image
- AI automatically organises notes into structured categories
- Tags, links related notes, and suggests connections
- Convert any note cluster into a full document with one click
- Searchable note library across all sessions
- Sync across devices

4.5. Adaptive Document

*One document — four reading levels,
automatically generated.*

- Write one master document
- AI auto-generates Expert, Executive, Student, and Beginner versions
- Each version adapted for vocabulary, depth, and assumed knowledge
- Versions remain linked — update master and all versions refresh
- Side-by-side comparison view of all four versions
- Export any version independently or all four as a pack

5. Intelligence & Research Tools

Advanced AI-powered tools for deep research, analysis, and insight generation.

5.1. Multi-Source Intelligence

Upload anything. Ask anything. Get everything.

- Upload PDFs, DOCX, XLSX, audio files, video files, YouTube links, images, and URLs in a single session
- AI ingests all sources and builds a unified knowledge model
- Ask free-form questions across all sources simultaneously
- Generate structured notes, summaries, and timelines
- Create flashcard sets and quiz questions from source material
- Contradiction Finder — highlights conflicting information across sources
- Export everything as a formatted document, CSV, or JSON

5.2. Exam Paper Builder

From textbooks to exam-ready papers in minutes.

- Upload textbooks, past papers, notes, and syllabus documents
- AI generates complete exam paper with multiple sections
- Question types: MCQ, short answer, essay, diagram labelling, equations
- Difficulty calibration: Foundation / Standard / Advanced
- Separate answer key generated automatically
- Fully editable before export
- Export as formatted PDF with proper exam layout

5.3. Narrative Report Writer

Upload data. Get a full written business report.

- Upload any CSV, XLSX, or data file
- AI writes a complete formatted business report
- Sections: Executive Summary, Methodology, Written Narrative, Trend Analysis, Anomaly Highlights, Recommendations
- Charts and visualisations auto-generated from data
- Tone options: Formal, Analytical, Executive
- Export as branded DOCX or PDF

5.4. Contract Negotiation Coach

Upload any contract. Get AI negotiation intelligence.

- Upload any contract (PDF or DOCX)
- AI identifies risky or unfair clauses with severity rating
- Objection prediction — anticipates counterparty pushback
- Suggests improved wording for flagged clauses
- Live negotiation simulation — practice with AI playing the counterparty
- Final negotiation brief exportable as PDF

6. Document Processing Tools

Powerful conversion, extraction, and document lifecycle management.

6.1 File Converter

Convert any file to any other file. No quality loss. No limits. The File Converter handles the full spectrum of document and media formats:

PDF Tools

- Merge PDF
- Split PDF
- Compress PDF
- Organize PDF
- Rotate PDF
- Repair PDF
- Protect PDF
- Unlock PDF
- Watermark
- Page Numbers
- Crop PDF
- Sign PDF
- Redact PDF
- Compare PDF
- Edit PDF
- Scan to PDF
- OCR PDF
- PDF to PDF/A

PDF to Other Formats

- PDF to Word
- PDF to PowerPoint
- PDF to Excel
- PDF to JPG
- PDF to TXT

Other Formats to PDF

- Word to PDF
- PowerPoint to PDF
- Excel to PDF
- Image to PDF
- HTML to PDF
- TXT to PDF

Office Conversions

- Word to PowerPoint
- Word to Excel
- Excel to Word
- PowerPoint to Word
- Excel to CSV
- CSV to Excel
- Markdown to PDF
- Markdown to Word
- JSON to Excel
- HTML to Word

Image Conversions

- JPG to PDF
- PNG to PDF
- JPG to PNG
- PNG to JPG
- WEBP to JPG
- JPG to WEBP

Audio & Video

- MP4 to MP3
- Video to Text

AI-Powered Conversions

- AI Summarizer (URL/Doc)
- Translate PDF (any language, layout preserved)

6.2. Smart Form Extractor

Upload any form — AI extracts every field perfectly.

- Supports scanned forms, invoices, government documents, and receipts
- AI recognises tables, checkboxes, handwriting, and multi-column layouts
- Extracts every field with label + value pair
- Export as JSON, CSV, or Excel
- Batch processing for multiple forms simultaneously
- Confidence score per extracted field

6.3. Document Version Reconciler

Upload two versions — AI explains exactly what changed.

- Upload any two versions of a document (PDF or DOCX)
- AI generates a plain-English change summary
- Flags high-risk changes (contract terms, financial figures, policy clauses)
- Explains what changed and why it matters
- Side-by-side diff view with colour-coded changes
- Export change report as PDF

6.4. Document Archaeology

Reconstruct the full history behind any document.

- Connects to Google Drive, Notion, or local file uploads
- AI links all versions, comments, edits, and related files
- Reconstructs the reasoning and decision trail behind changes
- Timeline view of document evolution
- Identifies who changed what and when
- Export full history report

6.5. Document Resurrector

Your abandoned drafts, completed by AI.

- Scans your document library for incomplete or abandoned drafts
- Shows completeness percentage for each draft
- AI generates a full completion draft for each abandoned document
- Maintains original author's tone and style
- Review and edit completion before saving
- Never lose unfinished work again

7. Monitoring & Security Tools

Keep documents current, protected, and fully trustworthy.

7.1. Staleness Monitor

Never share an outdated document again.

- Connects to Google Drive or Notion via OAuth
- Watches source content referenced inside documents
- Detects when referenced sources change and flags the document
- Adds staleness badge to affected documents automatically
- Sends real-time alerts via email or in-app notification
- Staleness severity levels: Needs Review / Outdated / Critical

7.2. Document Analytics

Every shared document becomes a tracked asset.

- Know exactly who read your document and when
- Time-on-section data — see which sections readers spent time on
- Drop-off analysis — identify where readers stopped
- AI insights and recommendations to improve document performance
- Heat map view of engagement across the document
- Export analytics report as PDF

7.3. Confidence Scorer & Trust Shield

Every AI answer cited. Every uploaded document scanned.

- Every AI-generated answer displays a confidence percentage
- Exact citation shown for every factual claim
- Every uploaded document scanned for malicious content before processing
- Trust Score assigned to each document on upload
- Trust Shield badge displayed on verified documents
- Enterprise audit log of all document trust checks

7.4. Knowledge Interview Bot

Capture expert knowledge — transform it into documents automatically.

- AI interviews the user with targeted, intelligent questions
- Adapts follow-up questions based on answers
- Structures spoken or typed answers into a professional document
- Document types: SOP, Training Manual, Knowledge Base Article, Report
- Review and edit the generated document before saving
- Ideal for knowledge transfer, onboarding documentation, and expertise capture

8. Platform Architecture

How Veriscribe is built — the technical foundation of the unified document platform.

8.1 System Architecture Overview

Veriscribe is built as a microservices platform with a unified front-end layer. Each tool cluster runs as an independent service, but they communicate via a shared Document Intelligence Bus — a real-time event system that allows tool outputs to become inputs for other tools without user intervention.

Frontend Layer	Single-page React application with unified workspace shell. Responsive for desktop, tablet, and mobile.
Document Intelligence Bus	Real-time event broker connecting all tool services. Enables cross-tool workflows (e.g. detect → humanize → check plagiarism).
AI Processing Layer	Multi-model orchestration engine. Routes documents to specialised AI models based on task type. Supports 8+ detection models, generative models for creation tools, and analytical models for research tools.
File Processing Engine	Handles all format conversion, parsing, and rendering. Supports 40+ file formats with lossless conversion pipelines.
Storage Layer	Encrypted document vault with versioning. User documents isolated by tenant. GDPR-compliant data residency options.
Integrations Layer	OAuth connectors for Google Drive, Notion. REST API and webhooks for enterprise integrations.
Analytics Engine	Real-time document engagement tracking. Processes read events, section timing, and drop-off data.

8.2 Technology Stack

Frontend	React, TypeScript, Tailwind CSS
Mobile	React Native (iOS + Android)
Backend	Node.js microservices + Python AI processing workers
AI Models	OpenAI GPT-4, Anthropic Claude, Google Gemini, Llama, custom fine-tuned detection models
File Processing	Custom conversion pipeline with LibreOffice, Ghostscript, FFmpeg, and Tesseract OCR
Database	PostgreSQL (relational), Redis (caching/sessions), S3-compatible object storage
Infrastructure	Containerised on Kubernetes. Multi-region deployment. 99.9% uptime SLA.
Security	AES-256 encryption at rest. TLS 1.3 in transit. SOC 2 Type II (in progress).

8.3 Security & Privacy

- All documents encrypted at rest with AES-256 and in transit with TLS 1.3
- Documents are never used for AI model training without explicit opt-in
- Every uploaded file scanned for malicious content by Trust Shield before processing
- Per-user isolated storage — no document cross-contamination between accounts
- GDPR-compliant: right to deletion, data export, and data residency controls
- Enterprise SSO via SAML 2.0 and OAuth 2.0
- Full audit log of all document access and processing actions

8.4 API & Integrations

Veriscribe exposes a full REST API allowing enterprise customers to integrate document intelligence directly into their own workflows:

AI Detection API	Submit text or document URL, receive AI% / Human% scores and paragraph-level breakdown.
Humanizer API	Submit AI-generated text, receive humanised output with configurable intensity.
File Conversion API	Submit source file and target format, receive converted file.
Form Extraction API	Submit scanned form image or PDF, receive structured JSON of extracted fields.
Smart Summary API	Submit document URL or text, receive configurable-length summary.
Webhooks	Subscribe to events: document processed, staleness alert triggered, analytics threshold reached.

9. Plans & Ecosystem

Pricing, mobile apps, and the story behind the platform.

9.1 Pricing Tiers

	Free	Pro	Team	Enterprise
Price	£0/mo	£12/mo	£29/mo per seat	Custom
Tools	Core 9	All 21	All 21	All 21 + API
Documents / mo	20	Unlimited	Unlimited	Unlimited
File Size	10 MB	100 MB	500 MB	Unlimited
Detection Scans	5/day	Unlimited	Unlimited	Unlimited
Plagiarism Checks	3/mo	30/mo	Unlimited	Unlimited
API Access	—	—	—	Full REST API
Storage	500 MB	10 GB	50 GB/seat	Custom
Support	Community	Email	Priority	Dedicated

9.2 Mobile Apps

Veriscribe is available natively on iOS and Android, delivering the full document intelligence experience on mobile:

iOS App	Available on the Apple App Store. Supports iPhone and iPad. Full tool access, offline editing, Face ID document lock.
Android App	Available on Google Play. Supports all Android devices. Full tool access, biometric lock, adaptive layout for tablets.
Sync	All documents, notes, and settings sync instantly across web and mobile via secure cloud sync.
Offline Mode	Core editing and note-taking available without internet. Sync happens automatically when reconnected.

9.3 Our Story

Veriscribe was born from a simple frustration. Every document workflow required a patchwork of disconnected tools — each with its own account, interface, and export process. The founding team asked: what if one intelligent workspace understood your document end-to-end — from first draft to final polished output?

Veriscribe is not a collection of features bolted together. It is a unified system built around how documents actually get made, refined, and shared. Every tool was designed to talk to the others. Every workflow was considered from start to finish.

Today, Veriscribe serves writers, students, professionals, researchers, legal teams, and enterprise organisations who need their document work to be faster, smarter, and more trustworthy.

9.4 Our Promise

"We believe the tools you use to write, create, and protect your work should be as intelligent as the work itself. Veriscribe exists to give every writer, professional, student, and creator a single place where their documents are detected, improved, protected, and perfected — with nothing left to chance and nothing left behind."

Start Free Today

No credit card required. Full access to 9 core tools instantly.
